Individual Determinants Shorter Term

- A. Increased knowledge regarding sexual and reproductive health issues including physical, social, and emotional perspectives.
- B. Engagement in personal sexual values clarification.
- C. Increased agency in intimate relationship skills to negotiate sexual activity along with condom and contraception use.
- D. Increased self-regulation and motivation to avoid pregnancy and support healthy behaviors.
- E. Increased interpersonal communication knowledge and skills.
- F. Increased positive connections and communication between parents/trusted adults and youth about relationships and sex.
- G. Focus on friendships, school situations and short-term relationships.

Behavior Changes Longer Term

- Program recipients are more likely to:
1. Avoid pregnancy and STI's
 2. Avoid behavioral & other risk factors underlying teen pregnancy
 3. Demonstrate increased agency
 4. Use condoms and contraception
 5. Have fewer sexual partners
 6. Decrease sexual activity

Ultimate Goals

- Improve sexual and reproductive health outcomes
- Promote positive youth development
- Advance health equity and reduce disparities in unintended teen pregnancy and STIs with adolescents, their families, and communities
- Increase adults who respect the developing agency of adolescents
