## Chemistry of Attraction

### Caution!

During those exciting first few months—3, 6, even 9—it's amazing how those 'love chemicals' can sometimes cloud our judgment, making it a little too easy to dive into relationships that might not be the best fit.

### Overlooked Red Flags!

- Little to no common interest
- Not alike; nothing in common
- Deceiver; disloyal
- Dour and despondent
- Deceptive; lacking trustworthiness; exploits individuals
- Superficial; changes for approval
- Abuses substances
- Legal trouble
